### Guarantee:

All bulls selling for \$4,000 and above are guaranteed against breeding injury for the first breeding season, defined as the 90 day period following the first turnout of the bull. An injured bull will be replaced by its breeder with another bull, if available or a credit in the amount paid, less salvage value of the of the injured bull, will be given toward another of the breeders' bulls in next year's sale. This breeding guarantee does not cover the death of a bull.

### Food:

A complimentary lunch will be served.

## Welcome to the 31st Annual MKASB Bull and Female Production Sale

We are honored to welcome you to this year's 31st Annual Bull and Female Production Sale and sincerely appreciate your interest in our offering of Angus and SimAngus cattle. This year's event features one of the largest and most diverse selections we've ever presented, tailored to meet the needs of your operation. From 2-year-old and yearling bulls to open heifers and cow/calf pairs, we are confident you will find exceptional options to enhance your herd.

The Mid-Kansas Breeders take great pride in developing cattle that are balanced, sound, functional, and capable of adding significant value to your operation. With U.S. cow numbers at historic lows, there is unprecedented demand for genetics that improve productivity and efficiency, allowing producers to capitalize on record markets. Investing in seedstock is not merely an expense—it is one of the most impactful decisions your ranch can make to enhance growth, fertility, soundness, and overall performance.

Our bulls are developed to thrive in real-world conditions, ensuring they maintain their condition and provide lasting value to your herd. We carefully select for both phenotype and genotype to achieve balanced outcomes—prioritizing both the visible traits that meet your expectations and the genetic traits that deliver long-term improvements. By focusing on growth and carcass quality, we aim to ensure your animals deliver optimal value, whether at weaning, on packer grids, or ultimately at the dinner table.

This year's female offering is truly exceptional and represents the best we have ever raised. These heifers provide an outstanding opportunity to incorporate top-tier genetics into your herd. The cow/calf pairs we are offering vary in age, with nearly half featuring artificial insemination (A.I.) calves by their side and the other half sired by our proven herd bull, Game Changer. Thank you for joining us and for your continued support of the Mid-Kansas Breeders. We look forward to helping you achieve your ranching goals.

## EFFECT OF SIRE BREED ON SALE PRICE OF BEEF STEER CALVES

Superior Livestock Auction, Summer 2020<sup>a</sup>

SimAngus™-sired steer calves sold through Superior Livestock Auction in summer 2020 earned **more at sale time** than all other calves.<sup>e</sup>

It's no wonder the percentage of SimAngus™ calves marketed through the industry's largest video auction has grown **eightfold** since 2010.

Want low-risk, high-potential calves with earning potential?

## STAND STRONG SIMMENTAL

406-587-4531 • [simmental.org](http://simmental.org)

<sup>a</sup> For lots of 50 head or more. <sup>b</sup> Kansas State University, December 2020, Superior Livestock Auction data analysis of 3,280 lots, 394,900 head of beef calves marketed during summer 2020. (P<.0001)  
<sup>c</sup> Lots that qualified for breed-related programs were excluded from the model due to potential confounding effects with sire breed analysis and, for many, few lots in the data set.  
<sup>d, e</sup> Means without a common superscript differ (P<.05). Lots of calves in breed-identified groups were sired by bulls from the respective breeds and out of dams with no Brahman influence.

Heifer Bull with high performance. Dam is a great producing 10 year old cow. She is here for a reason. Dam BR 5@95, NR 5@106

# MAKE YOUR CATTLE STAND OUT

You've made a significant investment in your genetics, but does the market recognize that? Stand out by differentiating your cattle with AngusLink<sup>SM</sup> programs: AngusVerified<sup>SM</sup> and the Genetic Merit Scorecard<sup>SM</sup>. AngusVerified validates your calves are sired by registered Angus bulls and make your cattle stand apart from other black hides on sale day. The Genetic Merit Scorecard gives buyers the confidence they need to pay more for your quality calves.

## ANGUS VERIFIED<sup>SM</sup>

## ANGUS LINK<sup>SM</sup> GENETIC MERIT SCORECARD<sup>SM</sup>

Users of the AngusLink programs earn **\$13-15/CWT PREMIUMS** on average. Give us a call, and learn how to claim your competitive edge with AngusLink value-added programs.

## American Angus Association \$Value Indexes

Dollar value indexes, or **\$Values**, are a tool used to select for several traits at once based on a specific breeding objective. An economic index approach takes into account genetic and economic values as well as the relationships between traits to select for profit.

**ANGUS**  
THE BUSINESS BREED

**Maternal Weaned Calf Value (\$M)**, an index expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

**Weaned Calf Value (\$W)**, an index expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. Over time, increased selection pressure on \$W will increase weaning and maternal milk traits while also continuing to increase mature cow size.

**Feedlot Value (\$F)**, an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

**Grid Value (\$G)**, an index expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

**Beef Value (\$B)**, an index expressed in dollars per carcass, facilitates simultaneous multi-trait genetic selection for feedlot and carcass merit. \$B represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a quality-based carcass grid.

**Combined Value (\$C)**, an index expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid.

Heifer Bull. The only April calf I have ever put in the sale. Out of my favorite F53 cow. BW only 77 lbs, and had an adj W/W of 725 lbs; 2nd among all SimAngus bulls. Attractive profile with dimension. He is 2 mo younger than many of his counterparts and will hit his prime by Spring turn out! Love these Gamechanger calves.

## Lance Reed Ficken

July 28, 1978-July 11, 2025

A cattleman, son, father, husband, brother, cousin, firefighter and friend to everyone, was laid to rest on July 19th, 2025 after a lengthy battle with cancer. You will be missed by all.
