**Lot Numbers:**  
The animals are tagged with their catalog lot numbers.

**Health:**  
All cattle sell with health certificates, ready for immediate shipping. Bulls have been vaccinated and PI tested, and have passed a breeding-soundness evaluation.

**Delivery:**  
Free in-state delivery of bulls, or we will give a \$50 per lot refund on bulls picked up sale day.

**Guarantee:**  
All bulls selling for \$3,000 and above are guaranteed against breeding injury for the first breeding season, defined as the 90 day period following the first turnout of the bull. An injured bull will be replaced by its breeder with another bull, if available or a credit in the amount paid, less salvage value of the of the injured bull, will be given toward another of the breeders' bulls in next year's sale. This breeding guarantee does not cover the death of a bull.

**Food:**  
A complimentary lunch will be served.

We welcome all of you to our 30th Mid Kansas bull and female sale. You will find this year's offering to possess improved genetic traits from past sales. These are bulls that will give you calving ease, some give breed leading growth, others have great carcass traits. You can find bulls that may give you all these traits in one animal. We have not forgotten about the maternal side of the equation. It has been said that it takes a good mother to produce a good bull, we have the good bulls in this sale...there are plenty of maternal traits bred into these cattle.

Look at the SimAngus bulls to put hybrid vigor into your replacement heifers and extra style in your steer calves. If you have baldy cows use one of our bald face bulls to maintain the white on the face and add a third breed for more hybrid vigor.

We are offering 17 two- to four-year-old bred pairs and 26 Angus, SimAngus Cross and Angus Cross open yearling replacement heifers. These females will improve your herd in the coming years and provide positive genetics to build back your cow herd to capitalize on these positive cattle market trends.

Thanks to everyone who makes this sale possible, and we look forward to seeing all of you on sale day.

### Videos at Your Fingertips

1. Open the camera on your smartphone.
2. Hover over the code in lot box.
3. Tap the link that appears.
4. The video will be linked on that page.

PROFIT THROUGH SCIENCE  
American Simmental Association

## EFFECT OF SIRE BREED ON SALE PRICE OF BEEF STEER CALVES

Superior Livestock Auction, Summer 2020<sup>c</sup>

SimAngus™-sired steer calves sold through Superior Livestock Auction in summer 2020 earned **more at sale** time than all other calves.<sup>ab</sup>

It's no wonder the percentage of **SimAngus™** calves marketed through the industry's largest video auction has grown **eightfold** since 2010. Want low-risk, high-potential calves with earning potential?

## STAND STRONG SIMMENTAL

406-587-4531 • [simmental.org](http://simmental.org)

<sup>a</sup> For lots of 50 head or more. <sup>b</sup> Kansas State University, December 2020, Superior Livestock Auction data analysis of 3,280 lots, 394,900 head of beef calves marketed during summer 2020. (P<.0001)

<sup>c</sup> Lots that qualified for breed-related programs were excluded from the model due to potential confounding effects with sire breed analysis and, for many, few lots in the data.

<sup>d,e,f</sup> Means without a common superscript differ (P<.05) Lots of calves in breed-identified groups were sired by bulls from the respective breeds and out of dams with no Brahman influence.

## American Angus Association \$Value Indexes

Dollar value indexes, or \$Values, are a tool used to select for several traits at once based on a specific breeding objective. An economic index approach takes into account genetic and economic values as well as the relationships between traits to select for profit.

**ANGUS**  
THE BUSINESS BREED

**Maternal Weaned Calf Value (\$M)**, an index expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

**Weaned Calf Value (\$W)**, an index expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. Over time, increased selection pressure on \$W will increase weaning and maternal milk traits while also continuing to increase mature cow size.

**Feedlot Value (\$F)**, an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

**Grid Value (\$G)**, an index expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

**Beef Value (\$B)**, an index expressed in dollars per carcass, facilitates simultaneous multi-trait genetic selection for feedlot and carcass merit. \$B represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a quality-based carcass grid.

### Combined Value (\$C),

an index expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid.

# MAKE YOUR CATTLE STAND OUT

You've made a significant investment in your genetics, but does the market recognize that? Stand out by differentiating your cattle with AngusLink<sup>SM</sup> programs: AngusVerified<sup>SM</sup> and the Genetic Merit Scorecard<sup>SM</sup>. AngusVerified validates your calves are sired by registered Angus bulls and make your cattle stand apart from other black hides on sale day. The Genetic Merit Scorecard gives buyers the confidence they need to pay more for your quality calves.

**ANGUS VERIFIED** ANGUS LINK **GENETIC MERIT SCORECARD**

Users of the AngusLink programs earn **\$13-15/CWT PREMIUMS** on average. Give us a call, and learn how to claim your competitive edge with AngusLink value-added programs.
